SUMMARY

I am a Junior Front-End developer with knowledge of HTML, CSS, JavaScript and React.

After graduating from the Kyiv Polytechnic Institute, I started to work in web sites optimization.

My experience in web sites seo helps me a lot in understanding how web sites and applications work.

Now I want to look into this from the other side, learn how to correctly and efficiently develop sites and applications.

In 2023 I passed the "Fullstack Developer" course from IT School GoIT.

After that, I did an internship as a Junior Front-end developer in a commercial project.

Currently I work as a Front-End developer at Pixoram, where I use JavaScript, HTML5/CSS3, and the React stack to develop the front-end of websites.

I'm looking for a job where I could join a motivated team to help them and expand my experience.

I am a fast learner, responsible and always up for a challenge.

SKILLS

HTML5/CSS3/SASS	REST API	WordPress
React	Git	
React Redux	Next.js	
Zustand	TypeScript	
Vite	Jest	

LANGUAGES

English - Upper-Intermediate
